## Employee Benefits at Resource Brokerage

### Want to Market Insurance on Social Media?

Getting yourself out there as an insurance expert on social media no doubt attracts more clients.

Most importantly, it can get you in front of all of the people connected to your contacts, people who would otherwise not hear your message.

Lucky for you, we can provide you with ready-made social media graphics and messaging. Click here to see [samples](#). Reach out to Nicole if you'd like to have these exact images on your phone, ready to go.

It gets you in front of the clients you already have, informing them of the ways you can assist them with their insurance needs. It also has the potential to get you in front of new clients, people you've never worked with before!
